Wakame

# Sustained Control of Marine Pests

## Te mau tonu o te patu orotā ā-Moana

Marine pests can damage the environment and affect economic, social or cultural values of the region. Above are the regions top 9 marine pests. Please follow these rules:

- Do not breed
- Do not spread or release
- Do not sell or offer for sale
- Destroy all Asian Paddle Crabs and Japanese Mantis Shrimps that are caught
- Clean your boat hull and niche area, no more than a light fouling permitted
- No ballast water, bilge water or any other sea water in your boat holding tanks before launching

A breach is an offence under Section 154N (19) of the Biosecurity Act.

Full details of the rules can be found at <https://www.aucklandcouncil.govt.nz/marinepests> and further information on marine biosecurity can be found at [marinepests.nz](https://marinepests.nz)
